\$8.75 .. KNIT SPORTS SUITS .. \$8.75
Three Piece Models

F. E. McLeod

Featuring Smart Styles and Color Combinations. Sizes 34 to 42

The New Hats Are Becoming, Youthful Styles, Matron Models \$2.95

Small shapes, Sailor types, narrow brims. They are offered in smooth or rough straws. Popular colors. All head sizes.

Men's Felt Hats \$2.75

Silk lined fedoras with snap brims and corded silk bands. Hats that give one a well dressed appearance.

Men's Botany Serge Suits Made-To-Your Order With Two Pairs of Trousers \$27.50

Suits of splendid quality, in a fairly heavy weight that most men prefer. Made in single or double-breasted styles with durable rayon linings. Sample suits in stock for your inspection.

Men's Top-Notch Oxfords \$5.75

Thick soled walking shoes. Smart young man's styles. The uppers of smooth black calf. Soles of No. 1 Oak Bend sole leather, Goodyear welted. Sizes 6 to 11.

Women's Spring Coats \$15.00 to \$24.00

Cleverly furled coats are considered smart; others that are Paris styled, in new wool fabrics. Crepes and Diagonals and Chongas Weaves. Fitted, belted and trimmed with fur, or collarless models with wide reverses and bright silk Scarfs. Sizes 16 to 42.

Women's Tweed Coats \$7.95 to \$12.00

Jaunty wool tweeds, springlike, yet warm. They are fitted and belted and show the newest style ideas in Collars and Sleeves. Sizes 14 to 42.

Men's Golf and Sports Shoes \$5.50

Two tone brown and smoke Oxfords with no-slip rubber soles. Goodyear welted. The uppers have perforated trimmings. Sizes 6 to 10.

Men's Golf Sets \$3.75

Fine wool sweaters and golf hose to match. Colors Burgundy, Blue, Green, Sizes 36 to 40.

Girl's Tweed Coats \$5.95

For girls of 5 to 12 years. Wonderful values in wool tweeds. Well made, fully lined, belted, with stitched collars and cuffs.

Wash Frocks---Polka Dots and Prints \$1.95

New gay and Springlike wash frocks with dots or flower patterns. Cleverly styled. Sizes 14 to 44.

Women's Golf Oxfords \$3.50

Light and comfortable on the fairway. Uppers in black and white or fawn and smoke; wedge or Military heels. Soles of Sportex. Widths B and C. Sizes 3 1/4 to 7.

Girl's Cotton Hose 25c. and 30c.

Fine ribbed hose, with long legs and snug fitting feet. Fawn shade. Sizes from 6 to 9.

Boy's Rayon and Cotton Socks---Pair 35c.

Mannish socks for the young fellows; patterned in blue, fawn and grey mixtures. Sizes 8 to 10.

Boy's Shirts \$1.00

Broadcloth and Khaki. Very well made of fine materials for big boys of ten to fourteen years.

Springtime Frocks \$6.75 and \$9.50

Silk Crepe frocks. Practically every style a matron or miss could desire, from jaunty pocket styles to frocks with full length sleeves; plain and brilliant prints one and two-piece styles. Sizes 14 to 46.

NEW DRAPERIES---Rayon Damask for Side Drapes \$1.75 Yard

50 inches wide, in gorgeous striped and floral designs. A drapery that will add to the beauty of your home

Rayon Drapery Net 60c. yard

At a new low price for such good quality. Floral designs in honey shade.

Bright Floral Chintz to Cover Your Bedroom Box --- Yard 22c.

Yard wide, bright colors, to add a cheery tone to your room.

Women's Cotton Hose 25c.

Smooth, well-finished cotton hose. Sturdy and serviceable. Finely knit, snug fitting legs. Fawn shades. 9 to 10.

 Golden Rule Navel Oranges, large size, dozen .. 50c.
 Lard, 1 lb. packages, 3 lbs. 25c.

Experiments Now In Progress May Result In Production Of Plants Of Greater Food Value

Wheat, cabbages and turnips may soon be found only in backward countries and museums, or grown as plant curiosities, if some of the entirely new plants now being produced by scientists are found to have greater food value.

For hundreds of thousands of years man has been content to accept the plants that nature gave him. Now and then nature in a sportive mood would cross plants and produce something novel and better adapted for giving a greater yield than either of the parent plants, but now scientists have found how by crossing to produce not merely new varieties but plants beginning a new genus.

Dr. W. P. Thompson, of the Department of Biology, University of Saskatchewan, recently returned from the University of Minnesota where he gave a series of lectures on cytology and genetics to graduate students there, and has enumerated some of the new discoveries in plant breeding.

In the wheat family a plant has been produced by E. Tschernak, of Vienna, in which each plant cell seen under the microscope has 56 chromosomes. In the wheat family everything runs in multiples of 14.

The wild wheat that grew around the shores of the Mediterranean hundreds of thousands of years ago and that still grows there, shows under the microscope 14 chromosome bodies in each plant cell. After many thousands of years, nature by some crossing or doubling up produced a wheat with 28 chromosomes, the Durum or Macaroni wheat.

Again in an inventive mood nature probably crossed this Durum wheat with a 14 chromosome plant, possibly the wild aeolops and made a 42 chromosome wheat, the parent of all our bread wheats. Now this scientist at Vienna has crossed bread wheat with aeolops and got a plant with 56 chromosomes. Whether it will be a better food plant than our bread wheat does not yet appear but it is quite within the bounds of possibility.

In Denmark they are interested in swedes and turnips and a scientist there, O. Winge, has crossed them and secured a new kind of plant (brassica napus). The swede has 10 chromosomes and the turnip (brassica campestris) has 18. The new plant has 28.

At Moscow, cabbages and radishes both go into the "borstsch," but G. D. Karpenchenko has a new plant with a chromosome number the sum of both of these. It may be a better soup plant than either.

A special word should be given to the work of Arne Munting, of Landskrona, Sweden, who was trying experiments with plants of the mist family. He crossed two distinct species and got a third species which was already a common plant, but not previously known to be so closely related.

British Broadcasting Corporation

Accepts Invitation To Send Representative To Imperial Conference

The British Broadcasting Corporation has announced that it had accepted the invitation of Raymond Morand, chairman of the Canadian Parliamentary Committee on Broadcasting, to send a representative to the forthcoming Imperial Economic Conference at Ottawa. The corporation's representative will be Major Gladstone Murray, chairman of the B.B.C.'s public relations committee, who is a Canadian.

Could Do Even Better

A young matron in whom the shopping instinct was strong asked a German butcher the price of hamburger steak.

"Twenty-five cents a pound," he replied.

"But," said she, "the price at the corner store is only 12 cents."

"Well," asked Otto, "why you don't pay it down there?"

"They haven't any," she replied.

"Ya ya," said the butcher. "Ven I don't have it I sell it for 10 cents only."

"Your engine's missing," remarked the mechanic. "I know it," growled the motorist, "and I wish the whole dash car was, so I could collect on my theft insurance."

Captain: "The pudding you made is very hard. Where did you get the flour?"

Cook: "From the bag behind the door."

Captain: "I thought so! That is Portland cement!" — Soudanlase-Brix, Stockholm.

Fateful Hour For Britain

How Professor Swanson Views Imperial Conference At Ottawa

It was time for economical reform, urgently needed to point the way out of depression, according to Professor W. W. Swanson, of the University of Saskatchewan, addressing the Alberta Educational Association's Annual Convention at Calgary. Professor Swanson pointed to the forthcoming imperial conference at Ottawa as the turning point in the British Empire's career.

"The fateful hour has struck for Great Britain and the Imperial Conference will determine whether the immediate future will be a period of retrogression or progression," he declared.

The British Empire should develop its internal trade channels and protect itself against discriminating tariffs of other nations. He believed development of trade within the Empire would be strongly urged by British delegates to the conference. Prof. Swanson maintained the British commonwealth of nations should be the leader in a movement to demonstrate to the world that complete independence of nations was folly. He suggested a carefully planned marketing system, a pool and co-ordination of resources of the various parts of the Empire.

Quebec Farmer Has Initiative

Built School In Isolated Bush Country For His Children

The problem of providing an education to a family of fourteen children living in the bush in complete isolation has been solved by a French-Canadian farmer, Theophile Soucy, who built and furnished his own private school and then appointed himself as school commissioner to choose a teacher. The Quebec Government, recognizing his initiative, granted him a small subsidy.

Many miles from Stoneham village, north of Quebec city on the road leading to Laurentides National Park, Soucy's little schoolhouse at its founding. The seating capacity at its opening was six but since then desks have been ordered on the average of one every year.

LIFE IS GLORIOUS AND GAY WHEN SISTER WEARS THIS DARLING DRESS

Who wouldn't be won over instantly by its charm and sophistication? It is just the last word in chic as its originator fashioned of brown caftan full crepe with lace trim. It's a splendid dress for simpler "best."

For party wear, when this cute model can be delightfully carried out in tulle, she'll love it, if you choose the Lyonsaise-pink shade. Finish the round neck and sleeves with a frill of pleated chiffon that tones with the silk. The pleating can be bought already at any of the trimming counters.

And it's so inexpensive to copy it. Style No. 879 is designed in sizes 8, 10, 12 and 14 years. Size 10 requires 2½ yards of 39-inch with 1½ yards lace.

Price of pattern 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Turn To Agriculture

Back To The Land Movement Live Issue In Ontario

The "back to the land movement" in Ontario would receive added impetus if a series of recommendations formulated by a sub-committee are adopted by the agricultural and colonization committee of the Ontario Legislature and approved by the House.

The report presented to the main committee recommended:

1. Banning of settlers for acreage cleared and seeded.

2. Immediate survey of vacant farms in Ontario.

3. Publication of the results of the survey in Canada and Great Britain.

4. Eventual establishment of a distinct department of colonization under a deputy minister.

5. Establishment of "shacks" in farming districts where prospective settlers would live while preparing the land.

6. The doubling of Ontario's cultivated acreage by a concentrated back to the land movement.

Specimens Hard To Find

London Museum Wants Frocks Worn Between 1890 and 1920

The London Museum, which is engaged on a collection of women's clothes throughout the centuries, is experiencing the greatest difficulty in obtaining genuine specimens of frocks and their accessories between 1890 and 1920. Several reasons are given for the dearth of such garments from the earth. They were ugly; we live in cupboarded flats to such an extent; they are unwearable by a generation that is slim all over, but has nothing like the slenderness of the waist in late Victorian and Edwardian days; and the vegetable dyes that composed them ate away the materials as earlier dyes did not.

Education Not So Costly

Inspector Says Manitoba Spends More On Candy In Corresponding Period

Inspector Andrew Moore exploded the theory of the high price of education, in addressing the annual convention at Winnipeg of the Manitoba Educational Association. More money is spent in Manitoba for candy than for high school education, he said.

The cost of high school education in the province was \$1,735,431 in 1929-30, Inspector Moore said, and in the same period citizens of Manitoba spent \$2,338,329 on candy and \$281,778 on chewing gum.

Merely Talk

One thing that renders conversation difficult is the fact that much of it is carried on by people who, having a little spare time, think they will proceed to settle questions that have puzzled the world for centuries.

B.C. Placer Gold

Newspaper Man Says Opportunities Exist For Putting Idle Men To Work In Cariboo Fields

Conditions in Canada could be greatly improved by putting thousands of men to work in the prospected placer gold fields of the Cariboo and Fraser rivers, in the opinion of George M. Bell, publisher of The Calgary Albertan.

"After all, the United States were saved from near bankruptcy by the gold rush in California in '49," he said. "There is no reason why the credit of Canada as well as the wealth of many individuals should not be increased tremendously by the huge quantities of gold still available in British Columbia."

Mr. Bell said that government surveys made public last year estimated there still was at least \$2,000,000,000 in alluvial gold waiting for the prospector in British Columbia. "I've spoken to Premier R. B. Bennett about this," said Mr. Bell. "I suggested that a few thousand men should be sent out into the gold fields. He told me it was not the first time the suggestion had been made to him, but that unfortunately the British Columbia mineral rights did not belong to the Dominion Government."

"I am certain," Mr. Bell said, "there are many places in the Cariboo where the ordinary pick-and-pan prospector can get a handsome living. There are thousands of other spots where small groups of men having some machinery can find profitable employment in producing the metal which will improve Canada's status in the world." Mr. Bell expressed himself decidedly hopeful about the economic prospects in the prairie provinces this year.

Scottish Trade Ship

Will Sail To Canada With Display Goods On May 5

It is announced that arrangements have been completed for the "Lettitia," Scottish trade ship, to sail for Canada May 5. The ship will carry leading Scottish manufacturers and their goods.

The exhibition will be opened officially 12 hours after the "Lettitia" reaches port. Scotland is determined to grasp this opportunity to show Canadians what she can provide.

Can Be Proved

The teeth were drawn by the Chicago Motor Club from the fan liar masculine warning: "Look out. There's a woman driving." The motor club announced it has found that it is from four to five times safer for all concerned when a woman is at the wheel.

"What has become of your Savings and Loan Society?" "Disbanded—all the members wanted to borrow and none to save."

BRITAIN SAVES COTTAGES FROM DEMOLITION

This peaceful scene shows a pair of old thatched cottages on Snelapste Common, near Newbury, England, which the British Government hopes to save from demolition. They are more than four hundred years old and in good condition.

Wheat Kings Of The North

Prince Albert Board Of Trade Does Honor To Champion Wheat Growers

C. W. Gilbert, of Big River, Sask., world's champion grower of hard red spring wheat at last year's International Grain Show at Chicago, and George Canfield, of Wild Rose, well-known wheat producer, were guests of honor at a banquet staged by the Board of Trade at Prince Albert. The gathering was representative of the business men of the city and farmers of the district, who gathered to do honor to Mr. Gilbert and show their appreciation of the publicity given the northern Saskatchewan district by his success in producing the world's best wheat.

C. H. McIntosh, president of the Board of Trade, introducing the guests of the evening, referred to them as "Wheat Kings of the North." Mr. Gilbert had captured the reserve championship prize for wheat and also for oats. The latter with a shipment of the Victory variety.

Canfield had won the provincial championship three times and also was prize winner at the Toronto Royal and International Grain Show. In recognition of the value of Mr. Gilbert's work, Mr. McIntosh presented him with \$100 on behalf of the Board of Trade.

Mr. Gilbert, in a brief address, expressed sincere appreciation of the honor paid him and assured those present that he would continue to carry on in producing wheat.

King George Attends

Quaint Annual Ceremony

Distribution Of Maundy Money Was Once Elaborate Ritual

When he attended the distribution at Westminster Abbey of the royal Maundy money the king witnessed a ceremony which no English sovereign has attended for a century or more. Distribution of the specially minted Maundy money is now all that is left of the one-time elaborate ritual. The recipients were poor people drawn from all over England, totalling 67 men and 67 women, corresponding to the king's age, and the money distributed amounted to about \$10 in lieu of provisions, and then 67 pence—or about \$1.10—which is the actual Maundy money, and is worth considerably more than its face value when, as it generally is, it is sold to collectors.

To each recipient of the Maundy money the king first handed a little red pouch containing the 50 shillings in the place of the old-time provisions, and then handed to them a little white pouch containing the actual Maundy money. This was in special coils of denominations from one penny to four pence.

Value Of Livestock

Statistics For Canada Show Value For 1931 Much Lower Than Previous Year

The value of farm live stock in Canada in 1931 aggregated \$468,300,000, as compared with \$687,225,000 in 1930, the Dominion Bureau of Statistics reports in an annual review. Ontario with an aggregate value of \$151,904,000, as compared with \$218,393,000, was the leading province. Quebec was second with total valuations of \$88,473,000, and Saskatchewan third, \$76,213,000. The live stock in Manitoba was valued at \$36,325,000 and Alberta, \$67,229,000.

The total value of all description of farm poultry is estimated at 43,138,000 last year against \$44,852,000 in 1930. Ontario also heads the list at \$15,551,000 compared with \$22,794,000 in the previous year.

Gasoline From Cottonseed

Making high-grade gasoline instead of salad oil out of cottonseed is chemistry's latest contribution in miracle working. The process for converting cottonseed oil into anti-knock gasoline at a cost of 35 to 40 cents a gallon was described by the American Chemical Society by Dr. Gustav Eloff of Chicago. The price is too high for commercial enterprise at present.

Many buildings are being erected in large cities of Switzerland.

Says Churchill Port Will Be Great Factor In The Return Of Prosperity To Western Canada

Less Forest Fires

Heavy Snowfall Of Last Winter In Northern Areas Is Welcomed

Fire rangers in the north country of Manitoba are looking forward to a year with a low fire loss as a result of the heavy snowfall this year in the area north of 53. While last season's record low fire loss is not expected to be duplicated, the damage to the forests in the opinion of the rangers will be lower than either 1929 or 1930.

A long wet spring is looked for by northern trappers, and if this is the case the possibility of fire during the early part of the season will be greatly lowered.

Since the provincial government took over the fire patrolling work in the north the loss has been much lower, and the cost of patrolling the forests has been cut in half.

The new tower system of the Manitoba Government will receive its first real test this summer. Steel towers with short wave wireless sets have been installed in many parts of the north country, and they will serve instead of airplanes in discovering small outbreaks.

World's Wheat Varieties

1700 Samples Of Seed To Be Shared By Manitoba and Saskatchewan Universities

A complete set of seed samples of the 1700 varieties of the world's wheats, collected by Professor John Percival of Reading, England, author of the most authoritative book on wheat varieties, will be shared in the cereal departments of the University of Saskatchewan and Manitoba Agricultural College. Dr. J. P. Harrington announced.

The purpose of securing these seed samples is to have available all possible breeding material to breed new wheats answering the requirements of high yield, high quality, earliness, disease resistance and drought resistance.

In reply to the question whether work had been done to secure a wheat for the north country with the good qualities of Garnet and without its defects, Dr. Harrington said that Reward-Garnet crosses had been made at the university, but that the work was not sufficiently advanced to announce any results at the present time.

Lion Causes Panic

Breaks Out Of Cage And Stomped Guests In French Restaurant

British, Canadian and United States society folk kept their heads and helped to stem a panic at a restaurant at Cannes, France, recently, when a performing lion broke out of its cage.

Seven hundred guests began to stampede when the beast leaped clear upon the dancing floor. Clothing was torn, tables were upset and there were screams of fright.

The orchestra continued playing loudly for such of the guests as continued dancing. Meanwhile others of the patrons calmed their more frightened companions. A fire hose was turned on the lion and it was herded back to the cage.

Among those who assisted in restoring quiet were Lady Asquith, Count Salm, former husband of Millicent Rogers; Lord and Lady Fermoy; Mrs. Paul Dubouet, the former Jean Nash; Mrs. Albert Soper, of Ottawa; Sir Geoffrey Archer, the big game hunter, and Lord Mountbatten.

Tries New Experiment

California Anatomist Constructs Dwarfness By Gland Injections

Dr. Herbert M. Evans, young anatomist of the University of California, has been revealed as the first scientist to counteract dwarfism by "synthetic" gland injections.

Using a "synthetic" extract derived from the front lobe of the pituitary gland of cattle, Dr. Evans selected for his human subject a girl identified as "Miss J. M.", 9½ years old, who suffered from arrested development.

Regular injections were given the patient from December 4, 1930, to August 17, 1931. At the start of the experiment, Dr. Englebach reported, the girl weighed 27.5 pounds and was 35.5 inches tall. At the end she had gained 10 pounds, grew 2.7 inches taller and her hand circumference .06 inches, the report declared.

The Invisible Three

While the young sailor was waiting to take out his young lady, the latter's little sister entered the room. "Did you know my sister's got three other boy friends?" said the child.

The sailor picked up his ears at this piece of news.

"Really?" he said in surprise. "I haven't seen any of them."

"Neither have I," returned the child, "but she gave me a shining tell you."

Telephones cables now are being made whose individual wires are as fine as a hair, 1,899 pairs of twisted copper strands being contained in a section.

Churchill, Western Canada's New Port on the Hudson Bay, was visualized as a northern industrial centre, a great ocean port and as a factor in bringing the west out of the hole it is now in, in addresses given by Gen. R. W. Patterson and Hon. D. G. McKenna before the On-to-the-Bay Association at Moose Jaw.

Gen. Patterson and Mr. McKenna spoke at a banquet held in the Grand Hotel.

There is no force on earth that can prevent Churchill and the Bay route being a great success if you gentlemen do your part," Gen. Patterson stated. "Keep up the spirit of the organization and you will not regret the hard work of the past few years."

The port was characterized by the speaker as being one of the greatest factors in helping the country to come back. It was unfortunate that conditions at the present time were such that the wonderful send-off planned for the official opening would have to be curtailed somewhat, but he claimed the present was the time to get together and get the route working, even if it was on a smaller scale than was originally planned. Every ship that sailed into and out of the port would be an encouragement to others to do likewise, and in this manner freight and insurance costs would be cut.

There were, difficulties, Gen. Patterson said, and the more fog and darkness that could be lifted from the situation, the more rapidly would the route and the port develop. The facilities and all aids to navigation would be at the port by July.

Possibilities of tremendous development at Churchill and in the Churchill area were foreshadowed by Hon. D. G. McKenna, Winnipeg.

Mr. McKenna visualized the importance of the bay route and the port in the years to come and of the industries which may find a place in the economic life of the people who will live there.

His address pertained to the town site of Churchill and the opening of the port. The date of this would depend, he said, upon the Department of Railways and Canada at Ottawa who had control of affairs in connection with the port at the present time.

Opening his address, the speaker gave a description of the territory within 150 miles of the port. This was very level and covered with muskeg but with proper drainage, could be transferred into first class grazing land. At this point he visualized cattle being shipped to the territory and finished before being shipped to Great Britain and European ports.

Considerable work has already been done on the town's site in the matter of clearing the land of rocks and leveling of hills. The result has been that the town is set on a southern slope with perfect drainage.

The task of protecting waterworks from frost was a rather difficult one and the matter of a winter water supply therefore was a problem. This however could be overcome, he said.

The town as a whole also presented a serious fire hazard for it was 500 miles from the nearest community and at certain times of the year strong winds from the bay were prevalent. This, however, could be overcome by the stipulation that all buildings be of fireproof construction and that houses be built of fire-resisting materials. There was plenty of stone and rock in the vicinity for this purpose, Mr. McKenna stated.

At the present time and probably for a few years to come, the government was not in favour of a heavy influx of people into the area for if these were to be left stranded in winter time, the government would have to take care of them or take them out of the territory.

Britain's Public Roads

There are 177,256 miles of public roads in Great Britain, according to the Ministry of Transport. It would be necessary to drive 162 miles daily for three years in order to cover every mile of highway under Government supervision. The last day of all you could take it easy, as you would only have to cover 28 miles.

Southeastern Manitoba is more heavily infested with noxious weeds than any other section of the prairie provinces, according to a report presented to the national research council.

"What would your mother say if she saw you in that daring costume?"

"She would be very cross. It is hers!"—Wahre Jakob, Berlin.

SPRUCEVILLE NEWS

The afternoon meeting of the U.P. W.A. will be held at the home of Mrs. O. S. Young, Wednesday, April 27th. A paper on "Horticulture" will be given by Mrs. Walker. Roll call to be answered with Garden Hats.

Four old Dobbin and Lizzie Ford are being pensioned off and two new Pontiac cars have taken their place, being driven by Mr. Walter Barnes and Mr. Sandy Swanson.

Mrs. Young and daughter of Ontario who have been visiting with their relatives here left for home on Wednesday.

Mr. H. A. Craig and Mr. S. G. Carlyle of Edmonton were visitors in the district last Friday, looking over the herds of James Boden and D. A. Boden, purchasing a young Ayshire Bull from the latter.

BENTLEY NEWS

Born at the Bentley Hospital, to Mr. and Mrs. Alpers, of Ponoka, a son.

Miss Alice Blaikie spent the weekend in Edmonton with her mother. Mr. and Mrs. A. Allan, of Lacombe were visitors at the home of Mr. and Mrs. Chas. McDougall over Sunday.

Mr. and Mrs. T. Wilkes, of Lacombe, were visitors at the home of Mr. and Mrs. Meares, of Bentley, on Sunday.

Mr. and Mrs. Fred Blane, of Red Deer were visitors at the home of Mr. and Mrs. Chas. McDougall over the week end.

Mr. Hugh Gunn, who has been in business in Bentley for a number of years has sold out, and will be leaving Bentley in the near future.

The Sylvan Lake Dramatic Club are presenting the play "The Green Slip" on Friday night, in the Bentley Hall. This play is well worth seeing and everyone should attend.

Mr. and Mrs. Roy Osborne spent the week end in Bentley at the home of Mr. and Mrs. Osborne.

FAIRVIEW NEWS

Mr. and Mrs. George Proven spent Sunday with Mr. and Mrs. W. Chesser.

Don't forget that all roads will lead to Fairview Church on April 29 to see the play entitled "Problems of the Ladies' Aid." A big treat awaits everybody.

It is rumored that wedding bells will soon ring for one of our young ladies in this locality.

Miss Ila Fiewelling, Clyde and Lyle Fiewelling spent Sunday with their mother Mrs. W. Chesser.

Mr. Fred McMullen spent Sunday with Mr. and Mrs. Wheeler.

Mr. William McNeil paid a flying visit to this place on Saturday.

CLIVE NEWS

Mrs. Emily McWilliams has been home this last week, from Red Deer.

The attendance at the United Sunday School was 73 last Sunday; teachers and officers 7, leaving 66 children. Still there are boys and girls who do not attend. How could you employ an hour better than visiting our S.S., where we are trying to learn and teach God's word, bring your children out at eleven o'clock Sunday morning.

Miss Dorothea Allison is in Edmonton renewing acquaintances.

Mr. Alf Law has 80 acres seeded to wheat. Alf is a hustler.

Mr. B. Somerville is driving a new car.

Mrs. Milton Coote entertained friends Friday evening.

Watch for Mother's Day at the U.S.S.

Mr. Lee Ditzler washed his Nash Sunday last. It looks fine anyway, Leo.

Miss Bagley is back on the job of teaching "les enfants."

Rev. Leard's mother, who resides in Saskatoon, is ill. Mr. Leard is thinking of driving down to see her.

The rummage sale was a great success. The only drawback was that the country was not all solicited. The proceeds amounted to around \$100, which went to the hall. Try another one.

The farmers are getting rich now, Eggs 6c.; butter 10c. The man who's salary is \$125.00 a month now should be saving money. One couple in our town live on 6c. a day, and they have plenty.

The funeral of Mr. and Mrs. Royal Huskin's child, took place Saturday, April 16. The parents reside in Calgary.

We are glad to welcome Mrs. Northcott and her boys back to Clive.

MORNINGSIDE NEWS

Mrs. Paul Sutherland is confined to the house with the "flu".

Mrs. George Grant spent the week end in Red Deer, visiting her daughter Mrs. Wilcher.

Mrs. Thelma Bowie spent Sunday with Mr. and Mrs. Bowie. On her return to Edmonton she took with her, her son, Jackie, who has been visiting his grandparents.

The farmers are robbing over the excellent run on Saturday night and Sunday. They declare the seed-bed to be in fine condition for seeding.

Mr. Zaak started work on the railroad on Monday with a full crew.

Mr. Alex McKinnon is helping Mr. Eldo Lockertle also green feed this week.

Mr. Robert Riddochs baling green feed to ship south this week.

The people of Morningside, Fairview and Iowaka, will all unite in extending felicitations to one of Morningside's popular and respected ladies, Mrs. William Leitch, with

recently Miss Elizabeth A. Riddoch. The occasion of this "well-wishing" being her marriage to Mr. William J. Leitch, also of Morningside, formerly from Ontario. Mr. Leitch, while not so well known as his bride, has already made many friends in the community who will join with your bride in congratulating him upon his good fortune in obtaining such an excellent companion in life. The marriage ceremony was performed at the residence of the bride, by the Rev. M. L. Wright, of Morningside, on Saturday evening, April 9th. The subscribing witnesses were Mr. James Riddoch, of Joffre, Alta., brother of the bride and his bride of March 24. Mr. and Mrs. Leitch will make their home on the farm of Mrs. Leitch, with the assurance that their neighbors wish them a long, happy and prosperous life together.

WELL! WELL!!

Maloney, the ex-cleric, had the Western Globe served with a writ on Tuesday last, charging "Defamatory Libel." On other occasions Maloney has taken action against one or two Alberta newspapers, but these papers have seen fit to apologize to him for their remarks, and have been forgiven.

In the case of The Western Globe there will be no apology forthcoming we will defend our case, and let the judge settle it. The preliminary hearing is called for Monday next at 1.30 in the Town Hall, Lacombe.

MOISTURE CONDITION GOOD

Moisture conditions are exceptionally good in the central and northern areas of Alberta, the heavy rainfall of last year providing ample sub-soil moisture. In southern Alberta, moisture conditions are improved as compared with a year ago, but spring rains will be required owing to lack of reserve moisture. Livestock is reported in good condition, with feed supplies adequate, especially in central and northern portions of the province.

SNAPSHOT CONTEST

The local Snapshot Contest is being conducted in conjunction with the National Snapshot Contest by the Cameron Studios, Lacombe, from May 1st to Oct. 23, 1932. All snaps entered in the National will automatically be entered in the Local Contest. A first, second, third and a number of Honorable Mention Prizes will be given each week from snaps entered in the way of Beautifully Finished and Mounted Enlargements bearing the Official Gold and Silver Seals of the Association. The National Prizes are in Cash. Old negatives and slides but must be new prints. Entry Blanks are free at the Studio or any of our Associated Dealers, throughout the district.

AT THE AVALON

Double Feature
Forty stories above the street!
His knees turned to water, his brain reeled as he crept along the steel girder, but he gritted his teeth and carried on to meet his unknown father.

This is only one of the gripping scenes in which Thomas Meighan and Hardie Albright appear in their latest Fox picture, "Skyline," which will be shown at the Avalon this week. Featured with this popular team are Maurice O'Sullivan impersonating an Irish lass as pretty and winsome as her true self, Myrna Loy as a temptress of the metropolis, with golden hair, like a real Lorelei, and Donald Dillaway as a cadish youth about town.

Also Ken Maynard and his horse Tarzan "In the Pocatello Kid," Coming by Special Request, April 23, 29, 30, "Viennese Nights," Janet Gaynor and Charles Farrell in "Merely Mary Anne," May 5, 6 and 7.

BLACKHALDS NEWS

"The Passion Play of Oberammergau," 50 slides will be given at Blackhals on Friday night, of this week in the United Church at 8:30 p.m. A silver collection will be taken. You are invited. The United Church Sunday School will meet at 10 a.m. next Sunday, followed by the Preaching service at 11 a.m. The Pastor's subject "The Manifestation of the Sons of God," Service at Canyon at 3 p.m. and Spruceville 7.30.

IN MEMORIAM

Miller—in loving memory of John P. Miller, who accidentally drowned in Gull Lake near Lacombe, Alberta, April 17th, 1929.

I miss you at a thousand turns
Along life's weary way,
And home has never been the same,
Since you were called away.

You left behind some aching hearts,
That loved you most sincere
That never have, nor never will
Forget you Daddy, dear.

Always remembered by his loving wife and family.

THE CHURCH OF ENGLAND

IN CANADA
Diocese of Calgary
St. Cyprian's Church, Lacombe
Rector: The Rev. T. H. Chapman
April 24, 4th Sunday after Easter
10:00 a.m. Sunday School.
11:00 a.m. Holy Communion.
7:30 p.m. Evening Prayer.
Thursday, May 12th, 8 a.m.
The Bishop will be here for the purpose of administering the Sacramental Rite of Confirmation. Candidates meet every Sunday after the Service.

Sunday, May 16th, 8 a.m. The Bishop will be here and will be the Celebrant at Holy Communion. This date marks the 25th anniversary of the formal establishment of the Parish of St. Cyprian, Lacombe.

DRY U.S. POLLUTING CANADA

U.S. customs officials at Seattle say that American manufactured alcohol is flooding British Columbia and returning to that state in the guise of smuggled "bonded liquor," in such large quantities a conference of Canadian and American customs officers will be held soon regarding the situation.

"Department of justice operatives recently discovered a California alcohol ring, whose members have been shipping alcohol all along the Pacific coast, including into Canada," said one official.

NEW YORK'S UNEMPLOYMENT

Approximately 1,100,000 men, women and children in New York City are receiving some form of public or private aid or are in need of such as a result of unemployment, according to a special study being made by a committee of representatives of established charities.

LIMIT TRUCK LOADS

In an effort to protect the highways of the province from damage from unduly heavy load during the period in which the frost is coming out of the ground, and the roads generally are in a softened condition, the provincial highways department has placed restrictions on the weight of loads to be carried by trucks during the period from April 11 to 24. This period may be extended of conditions warrant, or the restrictions may be lifted before the date set if conditions are favorable.

The larger trucks are now restricted to one-half their ordinary loads.

WE ARE SORRY

It is a long time since the Ku Klux Klan took one of our citizens for a ride, but the outrage has not been forgotten. Mr. Ralph Mowbray, one of the parties implicated in the affair, in conversation with the writer, while admitting that he was guilty of the offence, thought that we were unfair in placing so much blame on him, while others equally guilty escaped free. Mr. Mowbray assures us that:

"I only did what I considered was my duty under my obligation to the Klan, of which I was a member. I held my own counsel, took my fine, and did not divulge the name of others implicated. The head of the Klan, and the one under whose authority it was done, was a Mason, and I will give his name if required. I consider him and others equally guilty."

This is true,
(Sgd.) Ralph Mowbray

The writer at the time of the tar-and-feathering, had only two names connected with the case, or we certainly would have published the names of all concerned. We had no cause for berating Mr. Mowbray, and personally have always found him fair to us. We assure Mr. Mowbray that we did not place any more blame on him than we considered at the time was necessary.

Overnight Bedroom Sleeping Cars Popular

Please reserve bedroom on Canadian Pacific 11:59 p.m. train for Toronto. It is a common call nowadays into the railway offices by the travelling public. The company reports a very heavy demand of late for this type of accommodation and this has necessitated operation of bedroom sleeping cars on the runs between Montreal and Quebec, Montreal and Toronto, Ottawa and Toronto, Toronto and Detroit, and Montreal and Detroit.

Privacy, comfort and the last word in convenience and luxury are keynotes of this latest development in overnight travel by Canadian Pacific as expressed in these single and double bedroom and compartment cars, which represent the equivalent of the finest of hotel accommodation. They provide all the luxurious appointments of individual private rooms with a real bed that assures deep and refreshing sleep. Each room has toilet, lavatory, electric fan, overhead ventilator with exhaust fan, reading lamp and other conveniences, the whole being decorated in tasteful colors. In the double bedroom cars an overhead bed may be opened from the wall, if desired, affording additional facilities.

Some further features of the sleeping cars may be enumerated, which make the hours of sleep so refreshingly delightful. Temperatures are controlled thermostatically throughout the train; roller bearings assure smoothness of motion; coil spring mattresses invite restful slumber; heavily padded carpeting harmonizes with interior arrangements, creating a general soothing effect. Berths are wide and long and unusually roomy. The service is presented to travellers as a masterpiece of transportation luxury and comfort. It is the realization of all those refinements of art and efficiency of which travel equipment designers long have dreamed. From the inception of this new service it has won increasing favor among travellers who distinguish between good average service and perfection in travel. The word "modern" has its fullest and most inclusive expression in these cars.

In the women's dressing rooms attached to the sleeping cars there is real comfort and satisfaction. The most fastidious women will find facilities such as she would expect to see in a first-class hotel. Mirrored dressing table and other toilet accessories provide maximum accommodation without overcrowding. Here are vanity chairs conveniently placed, simple artificial and natural lights in softly colored shades, a closely white lavatories with hot and cold running water, specially dispensed soap and a never-ending supply of clean linen. This affords the requisite pendant to refreshing sleep—perfect toilet.

The men are treated in like fashion. They too have commodious dressing rooms where they can foregather not only for the purpose of making their toilet but also for an enjoyable smoke before retiring or after they have retired. Their room is perfectly lighted, well ventilated amply supplied with lavatories of newest design and in decorations harmonious with the general finish and furnishings.

321

Layout shows (lower picture) single bedroom car and (above) double bedroom car.

A Good Citizen

The Sun Life has a Big Stake in the life of Canada, where

It maintains 29 branches.
It has 5,000 employees.
It pays annually in taxes over \$600,000.
It has invested over \$300,000,000 in Canadian enterprises alone.

Canadians have a Big Stake in the Sun Life

Last year it paid to Canadian policyholders or their dependants over \$21,000,000.

During this generation it will pay to Canadians or their dependants more than \$900,000,000.

Every beneficiary under a Sun Life policy receives society of a possible claimant for public relief

IMPORTANT NOTICE

GOVERNMENT OF ALBERTA

Income Tax Returns

Income tax returns under the new Provincial Income Tax, are now due and should be filed with the Superintendent of Income Tax, Qu'Appelle Block, Edmonton.

Before May 31, 1932

Forms for returns may be procured from any Provincial Government Office, such as court-houses, land titles offices, land offices, municipal secretaries, sheriffs, bailiffs, etc. or from any bank, or direct from the Supt. of Income Tax, Edmonton.

All persons residing, employed, or carrying on business in Alberta, are liable to a tax on income, subject to the exemptions provided for in the Act.

Taxpayers are urged to go at once to the nearest office where forms may be procured, secure the necessary forms and make their returns immediately. Those who after deducting the exemptions allowed in the Act, are not liable to a tax, need not file returns.

Full information re exemptions and method of filing returns, is contained on the forms themselves.

The general penalty for failure to file returns by the date specified is 5 percent of the amount of tax payable, with a maximum of \$500. Specific penalties are provided for failure to file returns under certain classifications.

CLASSIFICATION OF FORMS

- Form 1 is for individuals other than farmers or ranchers.
- Form 1A is for Farmers and Ranchers only.
- Form 2 is for Corporations and Joint Stock Companies.
- Form 3 is for Trustees, Executors, Administrators, Agents and Assignees.
- Form 4 is for Employers, including educational, charitable and religious institutions, making a return of the names and amounts paid to directors, officials, agents or other employees during 1931.
- Form 5 is for Companies and Joint Stock Companies making a return of all dividends and bonuses paid to shareholders and members during 1931.

Further information will be furnished on application to

Mr. J. J. Maloney's Christian Apologetics

"The Gateway", the journal of the University of Alberta, has the following editorial comment on one J. J. Maloney:

"We have commented in the last two editions of this paper on the activities of the self-styled orator, Mr. J. J. Maloney, who has been holding forth here for the past few weeks. It is our desire to make our final statement in relation to the attitude of this paper towards Mr. Maloney."

"The Gateway" is published to stimulate in its readers an interest in University matters and in matters of general interest or of general importance. The University itself is open to all denominations and all nationalities. We desire to make it plain that we do not encourage in the University the type of religious discussion which has as its aim the revival or continuance of animosities and antagonisms which should have been forgotten centuries ago. We wish to maintain harmony and respect for each other in our religious views. Further, we certainly hold no brief for any particular religious denomination, and in mentioning some of them in this article it is because of the conclusion we wish to draw.

"Some of our law students advise us that where evident that one material part of a person's evidence is grossly and palpably false, it dispenses with the necessity of proving the evidence to be from one who is unreliable. Now, our 'Canadian Orator' has offered a number of statements as evidence to support his sweeping and emphatic generalizations. In some cases, of course, with an astounding contempt for logic, he has stated conclusions but has brought forth no concrete facts to support them. In these cases, where there is no evidence, there is nothing to prove false. Let us take some of the evidence which he has offered us, though, and see how it stands up under investigation. If it is shown to be grossly and palpably false, then the whole of the 'Orator's' body of contentions is discredited. From among some of the allegations made in an attempt to justify his general statements, Mr. Maloney has cited the following:

"1. The Precious Blood Monastery on 100 avenue and 111 street is exempt from taxes. THE FACT is that the Assessor's office has proof that this institution pays upwards of \$1,500 taxes annually."

"2. He has referred several times to a statue in Quebec, which is supposed to represent a Catholic priest with his foot on a Protestant with the obvious intention of crushing him. Inquiries made in regard to this statue (familiar to many), disclose that the work represents a figure of St. Ignatius with his foot on the head of Satan, and symbolizes the triumph of good over evil."

"3. At one of his meetings he read a statement purporting to be from a certain young woman to the effect that she had been a member of the Precious Blood Community, and containing salacious allegations against the Sisters and ridiculous statements about their treatment of her."

"As Mr. Maloney must have known (if he investigated, as we did), the FACT is that this woman was never a member of ANY religious community, but was placed as a ward of the government in the Corrective Class of the Good Shepherd Institution. If Maloney knew of this fact, then he demonstrated malice in ignoring it, and showed that he cares little to what he stoops in slandering people."

"It is not amiss, surely, to suggest that in future the 'Orator' pay greater attention to the truth of his premises before he suffers his genius to hurry him to conclusions. 'We do not propose to do any further in showing the fallacies of the arguments of the 'Canadian Orator.' We have already stated above that when material part of a person's evidence is shown to be grossly false, the whole of the person's evidence is discredited, his hearers knowing that since it falls from the lips of an irresponsible man it ought not to be entertained. 'The Orator's' oratory is an example of strong assertions without proof, and declaration without argument, of course without dignity or moderation, with neither correctness in the composition nor judgement in the design. Our country is at present involved in many dangerous difficulties, we are beset with economic problems which demand the co-operation of every citizen and of every class of the community—if there is one thing that will extricate us from our present plight, it is unity and solidarity. A man who in times such as these seeks to set sections of the community at variance with another, who seeks to disrupt society by inflaming it with lurid and fictitious scandals and to arouse enmity and hatred by means of meretricious generalizations based on utter lies, is nothing more than a demagogue and a danger to society."

"These facts were announced Thursday by I. F. Fitch, president of the Calgary Provincial Liberal Association following meeting of the executive of the organization."

Mr. Fitch said that as a result of arrangements initiated by the executive of the Alberta Provincial Liberal Association at meeting at Edmonton prior to the close of the session, the question of party platform is now receiving consideration from Liberals throughout the province."

12,400 PERSONS ON CALGARY RELIEF

City of Calgary was maintaining an average of 12,400 persons of all ages through its relief department. It was shown Saturday in a classification of relief cases submitted to the special relief committee of the city council. The report dealt with cases assisted from January of this year, and was prepared by George

Thompson, civic relief supervisor. Making up the total were about 2,300 single men being served with two meals a day and bed tickets at Victoria Park, together with some receiving allowances while living at home, 349 women and girls, together with 21 of their dependants, and 2,400 married men, who, with their wives and children, numbered 9,784.

PROVINCIAL INCOME TAX RETURNS

Provincial Income Tax Returns must be in hands of the Supt. of Income Tax, on or before May 31, 1932. The tax is to be computed on the 1931 income. Those who after deducting the exemptions allowed in Act, are not liable to a tax, need not fill returns.

If you want your garden plowed as it should be plowed, ashes removed or any kind of team work done get in touch with Lloyd Hoppus. He is also prepared to do trucking and has a large truck at your service. Phone him at Phone 23.

George Brooks, of Lacombe was called to Bellevue on Tuesday, owing to the death of his mother.

Dr. G. M. Little will address the members of the W.L. at their next meeting the first Saturday in May to be held at the home of Mrs. W. Teward.

Detective Russell, of Edmonton, who has been in Lacombe for the past two days returned to Edmonton on Thursday.

Report of Presbyterial was given by delegate at the last regular meeting of the W.M.S. held at the home of Mrs. U. E. Reeves on Tuesday afternoon. Mrs. McFadden read a paper on the harmful influence of alcoholic liquor and Mrs. Misener conducted the devotional exercises, leading in prayer for the advancement of the gospel in all lands. The study of Korea was also continued. Tentative plans are under way for a Presbyterial picnic to be held in June in honor of Mrs. G. Barbour, a highly valued member, who is removed from Lacombe. The May meeting will be held at the home of Mrs. McFadden.

You are welcome to the Sunday Evening Worship in the Baptist Church. Service at 7.25. Evening Worship 7.30. Subject: 'God is Near.'

SMALLER WHEAT CROP IN STATES

The United States Department of Agriculture estimates on harvest of about 450,000,000 bushels of winter wheat in that country this year, as against 787,000,000 bushels last year. Climatic conditions west of the Mississippi river this winter and spring have been in marked contrast to those of last year. The yield per acre in 1931 was the highest on record, nineteen bushels. The immediate outlook is that the new crop will be the smallest with three exceptions, in twenty years.

TO SELECT LIBERAL LEADER

Liberal provincial convention at Edmonton, June 16 and 17, will appoint a successor to J. U. McDonald, K.C., MacLeod, who recently resigned as leader of the party in the province. Party platform will also be adopted.

These facts were announced Thursday by I. F. Fitch, president of the Calgary Provincial Liberal Association following meeting of the executive of the organization."

Mr. Fitch said that as a result of arrangements initiated by the executive of the Alberta Provincial Liberal Association at meeting at Edmonton prior to the close of the session, the question of party platform is now receiving consideration from Liberals throughout the province."

BAPTIST CHURCH

Sunday School. 11:00 Sunday School. 7:30 Evening Worship. Subject "God is Near." Everyone welcome.

Mid-Week Activities Monday 8:00 B.Y.P.U. Thurs. 8:00 Prayer Service.

**BABY
FRETFUL,
RESTLESS?**

Look to this cause

When your baby fusses, fusses and seems unable to sleep restfully, look for one common cause, doctors say. Constipation. To get rid quickly of the accumulated wastes which cause restlessness and discomfort, give a cleansing dose of Castoria. Castoria, you know, is made specially for children's delicate needs. It is a pure vegetable preparation; contains no harsh drugs, no narcotics. It is so mild and gentle you can give it to a young infant to relieve colic. Yet it is as effective for older children. Castoria's regulative help will bring relaxed comfort and restful sleep to your baby. Keep a bottle on hand. Genuine Castoria always has the name:

Wm. D. Galt
CASTORIA
CHILDREN CRY FOR IT

**WORLD HAPPENINGS
BRIEFLY TOLD**

It was reported Pope Pius probably would inaugurate the Eucharistic Congress at Dublin next June with a broadcast message.

The world's crop of winter wheat is only two per cent smaller than last year, judging by reports from 19 countries.

Dr. O. T. Avery, New York, who discovered a means of killing the pneumonia germ by dissolving its protective covering has been awarded \$1,600 by the American College of Physicians.

The motion of H. C. Nixon, Progressive leader, asking the Federal Government not to appoint a lieutenant-governor for Ontario for one year was voted down by the provincial legislature.

Russia is ranked by the Economic Review of the World, a publication by the Amtorg Trading Corporation, as second only to the United States in volume of industrial output and national income.

Great Britain intends to proceed without deviation with its program for India, Sir Samuel Hoar told the House of Commons, and will not be deflected from it "by threats of force or sudden alarms."

Miss Jessie F. Montgomery of the University of Alberta, has been awarded a fellowship by the American Library Association, it was announced. The fellowship is provided by the Carnegie Foundation for advanced study in library work.

Unemployment insurance is operating in 17 foreign countries today. These are: Australia, Austria, Belgium, Bulgaria, Czechoslovakia, Denmark, Finland, France, Germany, Great Britain, Irish Free State, Italy, Netherlands, Poland, Russia, Spain and Switzerland.

Robert Cedric Sheriff, whose war drama, "Journey's End," lifted him from obscurity as a writer, has arrived at Hollywood from England to become a scenarist at Universal Studios. His first assignment is to adapt Eric Maria Remarque's "The Road Back," a sequel to "All Quiet on the Western Front."

London Looks For Sensation

When Countess of Oxford's Biography of King is Published

English literary circles are expecting a sensation when a new biography of the King, written by Margot Asquith, famous for her caustic tongue, is published.

The witty Countess of Oxford, widow of Britain's first Great War Prime Minister, has lived in the inner circles of governing and social England for 50 years. She has always talked and acted fearlessly and when intimate histories of King George's reign are written she probably will go down as one of the most brilliant and unconventional women of his court.

Recently she had to sell her country cottage and had fallen on lean days. Ten years ago she made a fortune out of her memoirs and her biography of the King is expected to bring in another.

Fund Father: "Come, Tommy, even if you have hurt yourself a bit, you shouldn't cry."

Tommy: "What's a crying for, then?"

Flooding of Loch Lomond, Scotland, recently permitted boating in Balloch Park on the shore, for the first time in 20 years.

Romance Of Auto Trade

Canadian-Made Cars Shipped To Many Foreign Countries

Statistics are not always the arid things that critics make out. We pick up one of the daily bulletins of the Dominion Bureau of Statistics, find in it a most romantic story about our far-flung automobile trade.

The bulletin shows, by the way, that export of automobiles is on the increase though the thing that interested us most was the destination of the cars.

In January, British India purchased 144 all freight cars; the Gold Coast, 138; British East Africa, 84; British South Africa, 19; Great Britain, 18; Jamaica, 14; Aden, 3; British West Africa, 1; and Hong Kong, 1.

In addition to cars the following automobile parts were sold: British South Africa, \$10,000; Australia, \$8,764; New Zealand, \$7,341; Straits Settlements, \$2,187; British East Africa, \$2,078; Gold Coast, \$2,003; British India, \$1,499, etc.

Foreign countries purchased Canadian cars as follows: Spain, 80; Japan, 24; China, 19; United States, 15; Austria, 12; Panama, 6; Dutch East Indies, 4; Portuguese Africa, 3; French West Indies, 2; Mexico, 2; and Ecuador, 1.

Imagine a Canadian-made car in Aden, on the Gold Coast, in Australia and Spain! What a story there must be behind such sales!—Ottawa Journal.

"Mystery Hiking" In England

People Taken To Starting Point Under Sealed Orders

"Mystery hiking" was inaugurated by one of the British railroads some time ago.

A train left Paddington Station with young hikers who were handed itineraries of rambles at one of two stops on the train's route.

Not even the conductor or train crew knew where the train was headed until sealed orders were opened at the first stop. Passengers also were in the dark. The train stopped twice to enable hikers to alight and returned in the evening and picked them up.

GOOD LOOKING HOME WEAR HELPS IMMENSELY MAKE KITCHEN CHORES EASY

Every woman who can't have too many home ensembles that will tub and bath, and always come up smiling.

And today's model is just lovely. The dress is suitable for the house, garden, porch, marketing, etc. And incidentally, it's decidedly slimming to the heavier build. It has a very becoming slimming neckline. Then there is the diagonal belt seaming that reduces bulk. Inverted plaits give a graceful width and flare to the hem.

And isn't the one-piece apron attractive? And it won't slip off the shoulders either, for the suspender straps are useful besides being modish.

Design No. 910 includes the dress and the apron in sizes 10, 18, 20 years, 36, 38, 40, 42, 44 and 46 inches bust. Size 36 requires 3 1/2 yards of 35-inch material with 1 1/2 yards of 35-inch contrasting.

Price of pattern 25 cents in stamps or coin (cash is preferred). Wrap coin carefully.

Turkish Divorce Is Slow

May Take Years To Obtain Decree Under New Law

When there were no divorce laws in Turkey, and every man had at least a couple of wives, it was easy enough to get rid of them.

Just a wave of the hand, a few mumbled words, and it was done. But modern Turkey, with its western laws and emancipation of women, takes months, and even years, to separate a man and his wife, legally.

According to the first divorce statistics ever published in Turkey, there have been 2,127 divorces in one year. Of these, 131 took over three years to decide, 56 took from two years to 18 months, 136 from 18 to 12 months, 311 from one year to nine months, while 742 divorces were disposed of in from eight to five months, and 717 in from four months to one month.

The motives for divorce have been varied. Incompatibility of temperaments, 1,329 divorces, while other reasons have been polygamy, infidelity, desertion, neglect and "cause unknown."

It is noteworthy that out of 260 divorces for infidelity, the woman was the transgressor in 260 cases.

Divorce has proved to be lighter in the towns than the country. Istanbul heads the list with 246 divorces.

Started Leper Hospitals

Japan Will Always Remember British Woman Who Aided Underdogs

A British woman who will long be remembered in Japan has died in the person of a Scots family that came from Nonjandy with William the Conqueror. Something over 40 years ago Miss Riddell went to Japan as a church missionary. She abandoned the worthy but somewhat stereotyped service in order to devote herself to the lepers who begged their bread from door to door. She was not successful in inducing the afflicted wanderers to live in hospital, but lepers of the better class flocked to her. Inspired by her example, the Japanese Government built hospitals modelled on her Hospital of the Resurrection of Hope, and leper beggars are no longer allowed to roam at will.

THE RHYMING OPTIMIST

By Allice Michaels

DESCRIPTION

Her hair? Oh, well, I must admit I don't know just the shade of it; Bright bronze, perhaps, with gold fires lit.

Her eyes? In truth I cannot say If they are blue or black or gray; I only know they have a way

Of looking straight into my eyes And showing me strange mysteries, Delights and dreams beyond surmise.

Her hands? Always have lovers sung Of loved hands, slender, white and young, And fair as pearls about them hung.

But of her hands I only find That they are ever cool and kind, Their touch can ease my troubled mind.

This picture may not be complete, But you will know her when you meet, She is so dear, so true, so sweet!

Some Biting Remarks

Acid Statements Made By British Statesmen To Political Opponents

What is the most biting thing ever said by a statesman about a political opponent? I have always put highest Dunsell's description of John Stuart Mill as a finishing glossiness and the saying usually attributed to Lord Balfour that if a certain politician had a little more brains he might be described as half-witted. But here is an acid comment from an unexpected quarter, Gladstone's style was too torrential as a rule to permit of epigram. But he once observed of a man whom he distrusted that "he was of a composition to which water would add stability."

Leaves of an ordinary tomato plant will drop at the slightest sign of escaping illuminating gas in a home.

Progress In Africa

People Take Quickly To New Ideas For Advancement

Do not let us delude ourselves into thinking that the African will not in time demand his share of self-government as the Indian has done. Those who knew Africa in her old, untouched days are astonished at the rapidity with which new ideas are taking root, and every new school and road and trading store promotes more change.

The very fact that the African starts from a lower level of culture than the Indian is capable of accentuating the rapidity and gravity of the change. He has no load of ancient civilization to hinder him, no serious religious disputes, no excess of population fixed in the rut of old habits and ingrained superstitions. The difference between his level and that of the alien whites is so great that he is inclined, once he makes the plunge, to abandon all his own distinctive ideas and to aim directly at a Europeanized culture.

Recipes For This Week

(By Betty Barclay)

LEMON TAPIACA

(Serves 6-8)

1/2 cup quick-cooking tapioca.
3 cups boiling water.
1/2 teaspoon salt.
Rind 1 lemon.
1 cup sugar.
1/2 cup lemon juice.
2 egg whites.

Combine the first four ingredients and cook 20 to 30 minutes. Remove lemon rind and add sugar and lemon juice. Beat egg whites stiff, fold them lightly in, chill thoroughly and serve in sherbet glasses.

BAKED ORANGE RELISH FOR MEAT

(Serves 6-8)

2 large oranges.
3 or 4 slices canned pineapple.
1 teaspoon cinnamon.
1 whole clove.
1/2 teaspoon nutmeg.
1/2 cup pineapple juice.
1/2 cup sugar.
1 tablespoon lemon juice.

Slice oranges thin, using skin and pulp. Cut up pineapple. Combine all ingredients and place in a glass or earthen baking dish. Bake in moderate oven for 2 to 2 1/2 hours. This is a delicious relish with meats.

Scarlet Fever Preventive

New Treatment Being Tested But Is Considered Satisfactory

A new way to immunize children against scarlet fever, considered more potent than the anti-toxin now in use, was announced today by the United States public health service.

The new treatment is a "toxoid" consisting essentially of a mixture of scarlet fever germs and the anti-toxin manufactured by the blood to resist them, with formalin added as a preservative. The "toxoid" is still undergoing tests but is considered so satisfactory that physicians of the public health service are treating their own children with it.

A Difficult Test

Candidates for the post of announcer in one American broadcasting company had to pass a test, one phrase of which is "The seething sea ceaseth, and thus the seething sea suffeth us." Only ten of the 2,500 tested in the last two years received appointments.

Children have keener taste-sense than adults.

Perpetual Motion

A New Clock, Invented In France, Operated By Variations In Temperature

Perpetual motion has long been an aspiration of "visionary" inventors. It has been practically eliminated as a possibility in the thought of most serious workers. Yet a new clock has just been developed in France which comes as near to being a perpetual motion machine as anything yet devised. This clock employs a source of energy which seems to have been neglected hitherto—the temperature.

Temperature is everywhere and it varies everywhere. There is no normal location where the temperature will not change at least one degree in a day. It usually varies over a much wider margin. Yet this new French clock will operate 120 hours on the amount of energy it gets from a single degree of variation.

The clock, in which this temperature operates, utilizes a U-shaped glass tube, one end of which is insulated against temperature changes. In this tube is mercury. As the exposed end of the U comes in contact with the slightest variations in temperature the difference between it and the insulated end cause the mercury to move over to one side or the other. This change in the weight of the mercury tends to make the U swing like a pendulum, and this swinging stores up energy in the clock.

It is said to be absolutely silent and, getting all the power it needs from the temperature changes around it, it is good for an indefinite period.

Power to run a clock is one thing, and power for commercial purposes is another, but it is not beyond possibility that some means of taking advantage of air temperature variations will form a free and continuous source of power for all purposes.

At least this French clock does seem to bring something like perpetual motion much nearer—Christian Science Monitor.

Wringing Wealth From Waste

Scientists Say Apple Peelings Make Good Paint and Varnish

In these dark days of depression the scientists of the world are re-doubling their efforts to wring wealth from waste. The enormous dividends resulting from coal tar and the like have prompted them to turn their attention to the waste products of our farms, and with most encouraging results.

The latest discovery is that apple peelings, hitherto discarded, can be turned into paint and varnish. It seems that uronic acid, a new chemical of wonderful possibilities, has been extracted from the wax-like coating of apple peels in the laboratory of the United States Department of Agriculture by Dr. Charles E. Sandoz.

He extracts the new chemical in the form of a powder that is resinous to the touch and is water repellent. Leading paint manufacturers, on both sides of the line, have found that uronic acid increases the gloss and water resistance of paints and lacquers. There is every prospect that more than one million pounds of this valuable acid will be extracted from peels in the near future.

The waste from canning plants, skins left over from the dehydration of fruits and the residue produced in the manufacture of both cider and vinegar can be profitably utilized in this manner, says Dr. Sandoz.

Toll Of Disease

Heart Disease and Cancer Claim the Most Victims In Canada

Heart disease and cancer were the two most common causes of death in the last nine months of 1931, according to the Dominion Bureau of Statistics. Heart disease claimed 10,000 victims and cancer 7,662. Both were increases over the same period of the previous year. There was a reduction in the number of those who died of tuberculosis, the 1931 figures for months being 8,920, compared with 9,372 in 1930. The pneumonia deaths were 5,386, diseases of the arteries 4,481, diarrhoea and enteritis 3,809, nephritis 3,765, influenza 2,799. The influenza deaths in the nine months of the year before were 1,893. There were only two deaths from smallpox.

The death toll of the automobile in the nine-month period was 885. That was less than the same period of 1930, when the total was 917.

Hardly Worth Speaking About

If you have a good imagination, try and imagine what the newly discovered neutron, a part of an atom and of great importance to science, looks like. Prof. Lachlan Gilchrist of the physics department of the University of Toronto, told the Royal Astronomical Society its weight is represented by the 540th part of a million-million-millionth part of a gramme, and a gramme is about 2,600th part of an ounce.

A device which will turn on air beams automatically whenever darkness approaches has been developed.

The marvel of radio is that it lifts a man into the realm of divine music and drops him into a can of somebody's soup.

"Pilot, what do we do if we are in the air and the engine fails?"

"Open parachutes and drop."

"Suppose the parachute fails?"

"Flap your arms and say 'I am a dicky bird.'"—Notenkraker, Amster-

dam.

For Peace Of The Orient

China Needs A Stable Government In Order To Take Her Place In The World

A strong, stable government in China is necessary for the peace and well-being of the Orient, declared John M. Imrie, Edmonton, chairman of the trade mission of the Canadian Chamber of Commerce, in an address to the Board of Trade in Calgary. Mr. Imrie based his remarks on the visit to the Orient of the Trade Mission recently.

Conditions in China—a mighty people lacking co-ordination—were pictured by Mr. Imrie, who also gave a glimpse into the conflict between Japan and China. Japan, declared Mr. Imrie, believed the boycott by Chinese of Japanese goods was tantamount to war, although boycott was not recognized as such by the League of Nations or any of the peace pacts now in existence.

Racial antagonism, Japan's economic need of Manchuria, instability of the Chinese Government, mass banditry of Manchuria, impairment of Japan's political influence at Mukden and Japanese fear of new Russian penetration of Manchuria were among the causes which Mr. Imrie believed brought about the present conflict between Japan and China. Recent rise of nationalism in China, he said, was another cause, and it found reflection in strong anti-foreign feeling against other nations as well as Japan.

With a stable government, China would be an important nation of the world, and matters of trade with every other nation would be greatly advanced and Canada as well as the other nations would benefit.

A Rare Chemical

Phosphagen Found To Supply Energy To Muscles

A rare chemical, which gives speed to muscles and may be the essence of muscle, was described in a report to the American Chemical Society by R. Adams Dutcher, Pennsylvania State College.

The chemical is phosphagen and is secreted by the body. It is a combination of phosphoric acid and creatine, the latter a body protein product. Phosphagen supplies to certain muscles the energy to contract. But it is something more than mere energy, for apparently some muscles have no phosphagen and it is found most abundantly in highly-specialized, rapidly-contracting muscles.

The new uses of cotton were presented by H. J. Skinner, president of Skinner and Sherman, of Boston, Mass.

"Recently," he said, "much publicity has been said to experiments at the University of North Carolina, which, if successful, might revolutionize the cotton industry. Some time back a noted authority on forestry and lumbering asserted that he expected to see the time when cotton would be grown for its own cellulose content and not for its lint value, and it is upon this premise that the University of North Carolina experiments are based."

"The experiments propose to grow cotton like hay or wheat and harvest the whole plant with a mowing machine."

A new "lingering" anaesthetic, which continues to kill pain after an operation but has no habit-forming power, was reported to the society.

Conquers Dreaded Pneumonia

New York Physician Discovers Method For Destroying Germs

Discovery of how to pierce the protective "armor" of a pneumonia germ, making possible its destruction, has brought to Dr. O. T. Avery, of New York, a \$1,500 prize from the American College of Physicians. The prize is given in memory of Dr. John Phillips, of Cleveland, Ohio, who died while doing rescue work at the Cleveland clinic disaster, May 15, 1928.

Dr. Avery not only found how to pierce the pneumonia germ's armor, but was first to discover that it had this armor, or protective covering that shielded it from destruction. He then discovered another microbe which gives off a substance that dissolves the protective covering.

The pneumonia germ then is open to attack by the white corpuscles in the pneumonia patient's blood, which destroy it.

Many Tourists

A total of 4,909,989 automobiles entered Canada from the United States in the calendar year 1931 for touring purposes, a decrease of 499,469, compared with 1930, according to a statement just issued by the Canadian Government Department of National Revenue. Of the total, 3,439,492 cars entered for a period not exceeding 24 hours; 1,469,753 for a period not exceeding 60 days and 744 for a period up to six months.

Large Armies Available

A young Frenchman serves with the colors for 18 months, and remains in the reserves for 28 years. A young Japanese serves for two years, and remains in reserve for 25 years. A young Italian serves for 18 months, and stays in reserve for 19 years. As long as such systems are retained, armies cannot be materially reduced.

Perfection of a nickel-steel alloy called "elinvar" has been called the greatest technical improvement in watch materials since 1766.

**No more
dusting
for me!**

at least not with old-fashioned dust cloths. I've found a better way.

Thousands of Canadian women know that the "better way" is the Appleford Wonder Paper. Made from clean rags and soft paper pulp scientifically treated with high-grade furniture polish, it dusts—as it cleans—as it polishes.

Wonder Paper is changing the old-established order of house-cleaning. One neat package of it appeals more to women than yards of old rags that spread dust and constantly need washing to be sanitary.

You get twenty-five sheets of Wonder Paper for a quarter. Simply unroll a sheet into a soft wad, go over the furniture, woodwork, and the floors. The results are a delight. In half the time and with half the effort, you get a necessary task done far more satisfactorily.

And when you're through, throw away the piece of Wonder Paper. No shaking out, or washing, or dusting. Certainly you ought to try Wonder Paper.

Special Offer

WONDER PAPER is made by the makers of the famous PARASANI, the Heavy Waxed Paper in the green box. Most grocery, hardware and department stores have Appleford Wonder Paper in stock. If your dealer is not carrying it, we'll give you a booklet entitled "Lifelines," containing one hundred recipes, as a bonus.

Applied Paper Products, Ltd., Hamilton, Ontario.

Enclosed find 25¢ for which please send me one package of The Wonder Paper and your 100 recipes for "Lifelines."

THE HOUSE OF DREAMS-COME-TRUE

— BY —
MARGARET FIEDLER
Author of
"The Splendid Fairy," "The Hermit
Of Par Pond,"
Hodder & Stoughton, Ltd., London.

CHAPTER XVII.—Continued

Her voice wavered uncertainly. The realization of his intent had come upon her so unexpectedly, rousing her from her placid unconsciousness, that she felt stunned—nervously unready to deal with the situation. She struggled a little, instinctively, but he only laughed down at her, a ring of merriment in his eyes, holding her effortlessly, with all the ease of his immense strength.

"It's no good, Jean. You've got to hear me out. I've waited long enough. He paused, then drew a deep breath. "I love you," he said slowly. "My God, how I love you!"

There was an element of wonder in his tones, and she felt the strong hands gripping her tremble a little. Then their clasps tightened and he drew her towards him.

"Say it," he demanded.

It was then Jean found her voice. The imperious demand, infringing on that secret, inner claim of which she alone knew, stung her into quick denial.

"But I don't! I don't love you!" Then, as she saw the blank look in his eyes, she went on hastily: "Oh, Geoffrey, I am so sorry, I never guessed—I never thought of your caring."

"You never guessed! Good God!" with a harsh laugh—"It should have been I'd made it plain enough. Why, even that first day, on the river—I wanted you then. What do you suppose has brought me to St. Staple every day? Affection for Blaise Termar?"

"I thought—I thought—"She cast about in her mind for an answer, then presented him with the simple truth. "I'm afraid I never thought about it at all. I just took your coming over for granted. I knew you and Judith were old friends and neighbors, so it seemed quite natural for you to be here often—just as Claire Latimer is."

Burke searched her face for a moment. He was thinking of the other women he had known—women who would never have remained blind to his meaning, who had, indeed, shown their willingness to come halfway—more than half-way—to meet him.

"I really believe that's true," he said at last, grudgingly. "But if it is, you're the most unconscious woman I've ever come across."

"Of course it's true," she replied simply. "I'm—I'm so sorry, Geoffrey. I like you far too much to have wished to hurt you."

"I don't want liking. I want your love. And I mean to have it. You may not have understood before, Jean, but you do now."

She drew herself away from him a little.

"That doesn't make any difference, Geoffrey. I have no love to be given," she said quietly.

He shook his head. "It won't take you," he said doggedly. "You're the woman I want. And I mean to have you. . . . Don't you understand? It's no use fighting against me. You may say no, now; you may say no fifty times. But one day you'll say—yes."

Jean's slight frame quivered.

"You are mistaken," she said, in a chill, clear voice calculated to set im-

measurable space between them. "I'm not a cave woman to be forced into marriage. Oh!—the ludicrous side of this impulsive kind of wooing striking her suddenly—"don't be so absurd, Geoffrey! You can't seize me by the hair and carry me off to your own particular hole in the rocks, you know." She began to laugh a little. "Let's just go on being good friends and forget that this has ever happened."

She held out her hand, but he took no notice of the little friendly gesture. There was a red gleam in his eyes, a smouldering glow that needed but a breath to fan it into flame.

"You speak as if it were something that was over and done with," he said in a low, tense voice. "But it isn't! It never shall be. I love you and want you, and I shall go on loving you and wanting you so long I live. Jean—sweetest!—his voice suddenly softened incredibly—"I'll try to be more gentle. When a man loves as I do, he doesn't stop to choose his words." He stepped closer to her. "Oh! You little, little thing! Why, I could pick you up and carry you off to my cave with two fingers. Jean, when will you marry me?"

His big frame towered beside her. He paid no more attention to her dismissal of him than if she had not spoken, and she was conscious of an odd feeling of impotence.

"You don't seem to have understood me," she said forcing herself to speak composedly. "If I loved you, you'd have no need to 'carry me off' to your cave. I'd come gladly. But I don't love you, Geoffrey. And I shall never marry a man I don't love."

"You'll marry me," he returned stubbornly. "Do you think I'm going to give you up so easily? If you do, you're mistaken. I love you, and I'll teach you to love me—when you're my wife."

The two pairs of eyes met, a challenging defiance flashing between them. Jean shrugged her shoulders. "That you must be mad," she said contemptuously, and turned to leave him.

In the same instant his hands gripped her shoulders and he swung her round facing him again.

"Mad," he exclaimed hoarsely. "Yes, I am mad—for you. You little cold thing! Do you know what love is—man's love?"

She felt his arms close round her like a vice of steel, lifting her off her feet, so that she hung helpless in his embrace. For a moment his eyes burned down into hers—the hot flame of desire that blazed in them seeming almost to sear her—the next, he had hidden his face against the warm white curve of her throat, where a little afflicted noise thrrobbed tensely. Then, as though the touch of her snapped the last link of his self-control, his mouth sought hers, and he was kissing her savagely, crushing her soft, wining lips beneath his own.

He was wholly oblivious of her body away helpless as a reed in his strong grip, while the tide of his passion, like some fierce, untameable flood, swept over her resistlessly.

When at last he released her, she stood back from him, rocking a little instinctively he stretched out his hand to steady her.

"Don't . . . touch me!" she panted.

The words came driven between clenched teeth chokingly. Her face was milk-white and her eyes blazed at him out of their pallor. She felt as if her heart were beating in her throat, stifling her, and for a little space sheer physical stress held her silent. But she fought it back, asserting her will against her weakness.

"How dare you?" There was bitter anger in her still tones. "How dare you touch me—like that?"

The words came driven between clenched teeth chokingly. Her face was milk-white and her eyes blazed at him out of their pallor. She felt as if her heart were beating in her throat, stifling her, and for a little space sheer physical stress held her silent. But she fought it back, asserting her will against her weakness.

"How dare you?" There was bitter anger in her still tones. "How dare you touch me—like that?"

Palpitation of the Heart Could Hardly Get Around

Mrs. Charles Storm, R.R. 5, Pictou, Ont., writes: "I was troubled with palpitation of the heart; couldn't sleep, day or night, and was so weak I could hardly get around."

After taking Milburn's Heart and Nerve Pills I was greatly relieved of those attacks. My mother also has great faith in them and so do other medicine can help her so much for heart trouble.

I can assure you that Milburn's Heart and Nerve Pills are a wonderful builder.

Price 50c a box

With a swift movement she passed her handkerchief across her lips and then let it fall on the ground as though it were something unclean. He winced at the gesture; for a moment the passion died out of his face and a rueful look, almost of schoolboy shame, took its place.

"Do you—feel like that about it?" he said, nodding towards the handkerchief.

"Just like that," she returned. "Do you think—if I had known—I would ever have risked being alone with you? But I thought we were friends—I never dreamed I couldn't trust you."

"Well, you can't," he said unsteadily. "The sight of her slender, defiant figure and lovely, tilted face, with the scornful lips he had just kissed showing like a scarlet stain against his whiteness, sent the blood rioting through his veins once more. 'You'll never be able to trust me again, Jean.'"

Her thoughts flew to Blaise. She would trust herself with him—now, at any time, always. But then, perhaps—the afterthought came like a knife-thrust—perhaps he did not care for her as she cared for him.

"A man who—loved me," she said dully, "would not do what you've just done."

"He would—sooner or later. Unless his veins ran milk and water!" He drew a step nearer and stood staring down at her sullenly. "Do you know what you're like, I wonder? With your great golden eyes and your maddening mouth and that little cleft in your white chin. . . . You're angry because I kissed you. I wonder I didn't do it before! I've wanted to, dozens of times. But I wanted your love more than a passing kiss. I've waited for that—waited all these weeks. And now you refuse it!"

"You've not even understood that you're all earth and heaven to me. God! How blind you must have been!" She was silent. Her anger was waning, giving place to a certain distressful comprehension of the mighty force which had suddenly broken bondage in the man beside her. Dimly, from her own knowledge of the yearning bred of the loved one's nearness, she envisaged what these last weeks must have meant to a man of Burke's temperament. Was it any wonder, when suddenly moved to realize that the woman he loved not only did not love him in return, but had fallen even to sense his love for her, that his stormy spirit had rebelled—flung off its shackles? An element of self-reproach tinged her thoughts, as a measure the fault had been hers; her self-abandonment to be blame.

(To Be Continued.)

Canada's Economic Situation

Statistical Review Reveals Bright Prospects With Coming Of Spring

Bright prospects, with the advent of spring, in Canada's economic situation are noted in a statistical review issued by the Department of Trade and Commerce. The review covers statistical reports received by the Dominion Bureau of Statistics.

The "bright spots" include: A hopeful export outlook for Canadian wheat shown by world statisticians. Early spring shipments of Canadian cattle to Great Britain have been well received.

Canadian cattle markets are showing increased strength. Exports of Canadian lumber show a substantial seasonal increase. Shipments of nickel, particularly to the United Kingdom, is on the increase.

Domestic production of gold, petroleum, natural gas, show a decided improvement. Other government statistics issued recently also were favorable.

Poverty In Mayfair Streets

Many Of London's Aristocrats Are Living In Attics

Through the small, genteel streets of Mayfair, domain of London's aristocrats, poverty is stalking.

More than one peer, if the public but knew it, lives in an attic. More than one famous drawing-room, only recently alive with brilliant men and women, is dark and silent now. They were available at a good price to rich American visitors—but there are not as many rich American visitors now.

Although their fortunes are gone, some of those who have lived most of their lives in Mayfair cannot tear themselves away. They stay on, in bed-sitting rooms in the house of one of their former domesticities.

Oldest Wheel In World

One of the fundamental inventions of mankind is the wheel. Its discovery altered the entire course of human history. The oldest wheel yet found was recently discovered in Babylon, Iraq, and dates back to 3000 B.C. It formed part of a two-wheeled cart, and is said to be at least 1,000 years older than the earliest wheels used in ancient Egypt.

C. E. Farnborough, noted scientist, after 12 years of research work in the South Seas has experimented with a certain type of bug which kills the insect that destroys the sugar cane.

Hubby—"Do you know why I am like a mule?"

Wife—"No. I know you are, but I don't know why."

The New Style House

Eliminating Attic and Cellar Would Destroy Home Atmosphere

Before people generally begin to save money by eliminating cellars, garrets, treacherous back cellar stairs and many partitions as advocated by A. P. Greenfeder of St. Louis, Mo., centuries of tradition will have to be overcome. It might be hard for many a house owner to reconcile himself to a cellars or attics house and call it a home.

No one has protested against the idea that a few rows of cans on the pantry shelf should supersede sacks of vegetables in the cellar. And without doubt the boy of today finds the garage a suitable place for his bicycle. But where, except in the cool twilight of the nether regions of a house, could Mother and Dad provide congenial surroundings for the tandem upon which they rode into the century?

And then there's the attic which, even though costly, pays for itself in sentiment. How could one rummage around through all sorts of dust-covered articles and find such unexpected things as are found in attics if one lived in a "new style" house?

And how could the rain patter softly down upon the roof of an attic that never was?

Although such a house as Mr. Greenfeder pictures would no doubt cost less money, what becomes of that homely something that flourishes only in attics and cellars?

Trees Are Heavy Drinkers

Carolina Professor Of Hydraulic Engineering Gives Interesting Facts

The world's biggest drink of water is the daily swallow taken by trees and plants to slake their thirsts in summer. Its size is 20 to 30 per cent. of the water in the brooks and streams.

These figures were discovered in a rhythmic daily rise and fall in the water of North Carolina streams. The measurements were made by Thorn-dyke Saville, professor of hydraulic engineering and chief engineer of the State Department of Conservation and Development. The U. S. Geological Survey co-operated in the studies.

"Ground water" gave the clue. This is the liquid stored in the earth's cellar, the countless caverns, cracks and tiny spaces below the surface. This cellar is the source of water flowing in streams during dry periods in summer.

It is also the source of much of the water absorbed by the roots of vegetation. When the trees drink deeply, the ground water level falls rapidly, and so do the streams and brooks. As much as 35 per cent. fall in one day in the flow of a single stream has been observed by Prof. Saville. Virtually all of it was due to trees and plants drinking.

Visits California

C.P.R. Liner "Empress Of Britain" Is Greeted At Los Angeles

The "Empress of Britain," the Canadian Pacific's \$16,000,000 liner and the largest vessel ever to steam directly to the Pacific coast, entered Los Angeles harbor recently to the accompaniment of shrieking whistles.

The ten-deck vessel, engaged in the St. Lawrence-Cherbourg route during summer months, took on an additional 40 passengers and will sail for Southampton, England, via the Panama Canal and New York. Half of the 400 passengers came ashore for a tour of Southern California cities.

Aboard the liner were many prominent persons including the Earl and Countess of Stratford, Count and Countess De Perigny, Dr. and Mrs. William Jennings Price of Washington, D.C., and former Lieut.-Gov. Hon. R. Randolph Bruce of British Columbia.

Insects Are Deceived

Artificial Flowers Attract Butterflies Scientist Claims

"A rose by any other name would smell as sweet," said the poet, and tests in Germany have disclosed that even if the rose were artificial, it would be as attractive to the butterfly in its search for food. It is the color, and not the odor, that attracts, it has been found, the insects settling indiscriminately on paper and on real flowers that were scattered about a garden.—Christian Science Monitor.

Not In Danger

A visitor, walking in a mining district, came upon an old man turning a windlass at the top of a shaft.

"It was a very hot day, but the old man had thrown aside his hat, and the sunshine was streaming upon his bare head."

"If you expose your head to the sun in that way," said the traveller, "your brain will be injured."

"But the old man looked wearily at the speaker and shook his head. "If I had any brains I wouldn't be doing this all day long," he answered.

"How's your husband this morning, Mrs. Fragan?"

"Oh, he's very poorly, yer reverence—And it's mighty expensive disease he's got. The doctor says I've to keep him in good spirits!"

You said it!

Kept At High Standard

Quality Of Cattle On Canadian Ranches Has Been Improved

Encroaching wheat farm operations have reduced the cattle ranches of Alberta and Saskatchewan during the past few years, but the quality has been improved and the herds maintained at a high standard despite hard times.

Up to a few years ago 250,000 Canadian feeders were shipped each year to the United States and cattle from these two provinces have supplied home and foreign markets in many parts of the world.

Between the years from 1882 to 1913, Canada exported alone to Great Britain an average of 160,000 head of cattle per year. During the ten years from 1914 to 1924, the exportations to Great Britain decreased, but shipments to the United States during this period averaged close to 250,000 head per year.

Control Of Nerves

Living Nerves Can Be Switched Like Telegraph Nerves

Zoological proof that living nerves can be switched like telegraph wires was presented to the American Association of Anatomists meeting in New York.

If the nerve naturally controlling a muscle is destroyed, another nerve can be substituted by operation, and will operate the muscle very well.

Three switches have been made and their success verified at Yale University in the Osborn Zoological Laboratory. Donald H. Barron, who conducted the experiments, reported them to the anatomists.

The Terror Of Asthma Comes like a thief in the night with its dreadful throttling, robbing its victim of breath. It seems beyond the power of human aid to relieve until one trial is made of that remarkable preparation, Dr. J. D. Kellogg's Asthma Remedy. Then relief comes with a rush. Life becomes worth living, and the remedy is used persistently until the disease is put permanently to rout. Take no substitute.

A tool resembling an elongated brace and bit has been invented to bore holes in ground for setting out plants without requiring a man to bend his back.

A new steel alloy has been developed in the Soviet Union of Russia which is called stainless. It is made of common elements and can be produced at a low cost.

"What did your sister get with the 15,000 she inherited last year?"

"A husband."

Feverish?

"My baby's cheeks and hands were so hot," writes Mr. Bernard Bren, Enterprise, Ont., "I was frightened. I gave him a Baby's Own Tablet at noon and by afternoon he was all better."

Effective for colds, colic, teething. Absolutely safe. See certificate in each 25c package. 75c for 100c.

Law-Abiding Scotland

Country's One Convict Prison Has Only 180 Inmates

A great deal is heard about English prisons being shut for lack of customers, and nothing about Scotland, but perhaps the apparent oversight is due to the fact that the term "England" is used in a blanket sense to mean Britain as a whole. At any rate here is something definite about Auld Scotland.

Scotland has only one convict prison where men are sent to serve long terms for serious offences. It is at Perth, on the north-east coast of Aberdeenshire, and was originally established so that a harbor might be built by convict labor.

The prison has accommodation for 300 convicts. The number of inmates has steadily decreased in recent years, and at the present time there are only 130 residents—less than half capacity. There is only one "lifer" in the community.

When it is remembered that the population of Scotland is four and a half million people, including some great industrial cities, this is a remarkable record.—St. Thomas Times-Journal.

For years Mother Graves' Worm Extremator has ranked as a reliable worm preparation and it always maintains its reputation.

Experts on Babylonian art and that up to about 2400 B.C. the artists who represented human figures, placed the left hand in the palm of the right, but after that time the position was usually reversed.

Counsel (cross-examining prejudiced witness): "I suggest that Mrs. Gligins is anathema to you."

Witness: "Then you suggests wrong. It's only my friends I calls by their Christian names."

System Failed To Work

Meal Of Glass and Poisons Fatal To Indian Mystic

Narasinha Swami, an Indian mystic who thought he could swallow poison and other noxious substances with impunity, died a martyr to his own faith.

He was a Hathu-Yogi and believed that by virtue of exercises based on auto-suggestion and breath control he could swallow broken glass, deadly poison and balls without the slightest ill effect. He had given demonstrations at Calcutta and Madras and appeared at Rangoon before a group of scientists and physicians.

He swallowed nearly a quart of the deadliest corrosive poisons and then ate a handful of broken glass. Two hours later he said he felt ill. In another hour he was dead.

Woman Invents New Cloth

A new kind of waterproof tweed has been invented by a woman in Ireland. It is made from the wool of Angora rabbits, with a slight mixture of ordinary sheep's wool. It is claimed that the mixture is as soft as down and absolutely will shed rain.

"I've lost my umbrella," said the fussy fellow.

"What kind of a handle did it have?" asked the information clerk.

"I don't know," sighed the man, "I only noticed yesterday."

Latest wrinkle in vituperation comes from across the line, where an eminent official is described by a critic as "the only public man who could die or resign without creating a vacancy."

WHEN FOOD SOURS

ABOUT two hours after eating many people suffer from sour stomachs. They call it indigestion. It means that the stomach nerves have been over-stimulated. There is a cure. The way to correct it is with an alkali, which neutralizes many times its volume in acid.

The right way is Phillips' Milk of Magnesia—just a teaspoon dose in water. It is pleasant, efficient and harmless. Results come almost instantly. It is the approved method. You will never use another when you know.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for correcting excess acids. 50¢ a bottle—any drug store.

The ideal dentifrice for clean teeth and healthy gums is Phillips' Dental Magnesia, a superior tooth-paste that safeguards against a mouth. (Made in Canada.)

Color-Contrast Distinguish the Smartest Spring Frocks For Tea Hours, Bridge \$12.95

Cleverly styled new Spring Frocks of fine quality Silk Faille and Canton Silk, featuring striking color contrasts and novel sleeve and neckline treatments distinguish these new Spring Frocks for tea hours, bridge and other occasions. MANITOBA JAIL

INMATE KILLED
Winnipeg, April 17.—Twenty-year-old Mike Bihun, blonde bank robber, who had served less than one-fifth of a ten-year sentence for holding up and robbing the Bank of Montreal branch here in 1930, is dead tonight—inmate victim of a prison-yard gun skirmish Friday at Stony Mountain Penitentiary in which four others, two guards and two prisoners were injured.
Bihun was shot to death by prison guards as he watched the armed officials of the institution cut down two other prisoners who had overpowered two guards and were carrying the revolt to others. A bullet ricocheted from a stone in the yard and struck the youthful convict, killing him instantly.

LO.O.F. DISTRICT

MEETING AT ALIX
Odd Fellows from all Lodges of District No. 50 attended the District Meeting in Alix on Wednesday night, there being in all around sixty in attendance and it proved a most enjoyable and instructive gathering. The guests of honor were Bro. J. Allison of Granum, Grand Master of the Grand Lodge of Alberta; Bro. Wilson of Edmonton, Grand Scribe of the Grand Encampment; Bro. Todd of Lacombe, D.D.G.M.; Bro. Durant, the N.G. of Mirror Lodge. During the lodge meeting the Grand Master read the Commission to Bro. T. Wilson, the newly elected D.D.G.M. of District No. 9; and later presented the retiring D.D.G.M. with his jewel.

SASKATCHEWAN

CUTS M.P.'s TO 49
Quite a tidy little fuss has been raised in the Saskatchewan legislature over the redistribution of constituencies. The bill calls for 49 electoral constituencies instead of 60 as before. The cities will not be affected for there will still be three city seats, each with two members, but some of the famous old country constituencies will go by the board. There will no longer be any place on the political map for Bengough, Pipestone, Saltcoats, Canora, Vonda, Saskatchewan County, Lloydminster, Redberry, Jackfish Lake, Ile a la Crosse, and Cumberland. Instead, nine new constituencies will be added: M.L.A. apiece, these being Souris-Estevan, Bromhead, Assiniboia, Shaunavon, Gull Lake, Qu'Appelle-Wildsey, Melville, Watrous and Athabasca.

THREE BOYS BURNED TO DEATH
Vantage, Sask., April 17.—Three small charred bodies, resting together in a common casket, await burial in Edmonton cemetery near here Monday and an inquest into the deaths of a trio of village lads, opened Saturday afternoon, stands adjourned until Wednesday evening.

The bodies are those of James Port, nine-year-old son of Mr. and Mrs. H. Port; Lyle Keith, 10-year-old son of Mr. and Mrs. D. J. Keith, and Laurence McNaughton, 11-year-old son of Mr. and Mrs. A. D. McNaughton, all residents of Vantage and district.

They met a horrible death shortly after 11 o'clock Saturday morning when flames trapped them in the back porch of United Church Bldg. here and left nothing but their unrecognizable remains. Efforts by townspeople and brothers to save them from the fire proved unavailing.

The three lads are believed to have died from suffocation caused by kerosene fumes, originating from an explosion of the oil with which they are thought to have been playing.

HOGS AT LOWEST RECORD
J. D. Mackie, of Alix, shipped 80 hogs to Edmonton last week for which he paid but 3c. on a bacon basis, the lowest price in history.

TENDERS FOR COAL

SEALED tenders addressed to the Purchasing Agent, Department of Public Works, Ottawa, will be received until 12 o'clock noon, (daylight saving), Friday, May 6, 1935, for the supply of coal for the Dominion Buildings and Experimental Farms and Stations, throughout the Provinces of Manitoba, Saskatchewan, Alberta and British Columbia.

Forms of tender with specifications and conditions attached can be obtained from H. F. Dawson, Acting Chief Purchasing Agent, Department of Public Works, Ottawa; H. E. Matthews, District Resident Architect, Winnipeg; Man.; G. J. Stephenson, District Resident Architect, Regina, Sask.; Chas. Sellens, District Resident Architect, Calgary, Alta.; and C. F. Dawson, District Resident Architect, Victoria, B.C.

Tenders will not be considered unless made on the above mentioned forms.

The right to demand from the successful tenderer a deposit, not exceeding 10 per cent. of the amount of the tender, to secure the proper fulfillment of the contract, is reserved.

By order,
N. DESJARDINS,
Secretary.

Department of Public Works,
Ottawa, April 8, 1935.
